SUMMARY

Software developer seeking an opportunity to join an innovative team and further develop my skills. Over 1100+ hours of hands-on experience with diverse technologies acquired through CodeStack Academy.

SKILLS

Proficient: JavaScript, HTML, CSS, C#, Bootstrap, Material UI, Notion, Figma, Jira, GitHub, React.js
Developing: Microsoft Azure, Azure SQL databases, TypeScript, Tailwind, Framer-Motion, React Native, Angular

PROJECTS

Pill Pal || **This project is currently in progress** || **Front End Repo** || **Back End Repo** || **Notion** || **Figma**

As the team lead for Pill Pal, I took charge of designing the prototype using Figma, and outlining the entire app's features and requirements on Notion. I led a team in developing this React.js-based application, utilizing Material UI and Bootstrap components, and used Jira for task management. The goal of this app is medication adherence.

Pokemon Catcher || **Azure** || **Github Repository**

Revamped a JavaScript project by converting into React.js, Typescript, and Bootstrap. Used data from https://pokeapi.co to enable user-friendly searches for Pokémon, showcasing their name, type, abilities, and moves. Implemented additional features like random Pokémon selection and the ability to "catch" and store favorites.

GitHub Repository Explorer || **Azure** || **Github Repository**

Developed an advice generator web application using React and Bootstrap. The project involved calling an API and recreating a product design that was provided to us. The goal was to test our ability to accurately recreate the design and incorporate API data into the application.

EXPERIENCE

Health Plan of San Joaquin – Pharmacy Technician I (08/2019 - 11/2020)
➔ Mentored and educated new team members, sharing established processes, techniques, and best practices.
➔ Conducted thorough analysis of patient medical histories to assist in pharmacist decision-making during authorization requests, ensuring precise and prompt care.
➔ Coordinated with providers to obtain necessary approvals and clarify missing or incorrect information.
➔ Worked on strict 24hr daily turnaround times for authorization requests.

CVS Pharmacy – Pharmacy Technician (08/2015 - 01/2020)
➔ Took on a leadership role by training new employees on pharmacy procedures and best practices, going above and beyond my assigned responsibilities.
➔ Implemented a daily workflow board to proactively enhance team communication and task management, streamlining workflow and increasing productivity.
➔

VOLUNTEER OPPORTUNITIES

CCE League 2022-2023 League of Legends & Rocket League Championship (Saturday April 15, 2023)
➔ Staff Member: Assisted with set up, and overseeing the management of activities provided for attendees.

EDUCATION

CodeStack Academy, Stockton (9/2022 - Present) Expected graduation date: 9/2023
